Allowable Subject Matter

1. Claims 7-10, 14, 15 and 21-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Huang et al. (US Pat. Application 20040070491 A1) discloses a universal remote control 10 is provided with appliance activated setup capability whereby the universal remote control 10 may be setup by appliances to command functions of the appliances, illustrated as a TV set 14 and a VCR 15. The radio signals may be emitted from the universal remote control 10 in response to activation of a "setup" button of the universal remote control. The electromagnetic field produced by the antenna 102 can be limited in range so as to allow the universal remote control 10 to control the number of RFID tags to be read (page 4, column 2). During setup of the universal remote control 10, a consumer, purchases a VCR 15, the system described with respect to FIG. 1 may instruct that the user: a) plug an appliance (e.g., the VCR 15) into a power source; b) hold the universal remote control 10 close to the appliance; and c) press the power button to turn the appliance on. When the appliance then "powers on," the appliance provides device code data to the universal remote control 10 by means of a squawk signal to thereby cause the universal remote control to set itself up to command functions of the appliance; the remote control 10 may be adapted to use received DAS and/or RCD data to download needed command codes and/or icons from a data repository remote from the universal remote control (codes determined from outside source and not from tag) (page 2, column 2; Figure 4). However, Huang nor any other prior art of record disclose the claimed method of receiving a programming signal onto an RFID reader in a remote control device, wherein the programming signal conveys a complete codeset (including key data for each of many keys on the remote

control device), wherein the programming signal is conveyed to the RFID reader by an RFID transponder that is part of a codeset card.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art of record and not relied upon is considered pertinent to the applicant's disclosure as follows. Naughton et al. (US Pat. 6,020,881), Hayes et al. (US Pat. 6,225,938 B1), Haghawout et al. (USPat. 7,005,979 B2) and Hayes (US Pat. 7,046,161 B2), which disclose remote control programming systems.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davetta W. Goins whose telephone number is 571-272-2957. The examiner can normally be reached on Mon-Fri with every other Fri. off.
